## Validation SIL3 successfully completed

On January 2008, Velan Srl obtained their certificate of Validation from the Bureau Veritas Italia for the safety analysis report on trunnion mounted ball valves SIL 3. (Safety Integrity Level 3)

## A warm welcome to our two new sales colleagues

The beginning of 2008 brought 2 new sales team members: Marco Tassotto, former Corporate Manager with ENI Procurement, is Business Development Manager; and Alessandro Merialdo, former sales person for an Italian valve company, is Area Sales Manager. This is yet another positive step in our efforts to provide our esteemed customers with the best services we can offer.

## Velan Srl API 6D gate valve, a product with a pedegree

The trunnion mounted ball valve is without a doubt a product with a pedigree. Created by Velan Srl, a company created between Velan and a small group of Italian valve specialists over five years ago, the TMBV is the perfect complement to Velan's renowned product range. Our TMBVs are used worldwide and employed on underground and sub-sea pipelines, on FPSO, on LNG units, upstream, midstream, and in the downstream sectors.

To continue our success and to further expand our business and services for our customers, we are introducing our newly designed API 6D Through Conduit Gate valve. We're also planning to add a few more products to our existing line in upcoming months.

We welcome any enquiries from our customers.

## Brazil: FSTP awards Velan Srl the contract for P56

We have achieved another ambitious step in our growth thanks to the Petrobras FSTP P56 Platform contract. After successfully completing the FSTP P51 contract back in 2006 and 2007, Petrobras awarded us a new contract.

## Australia: Alinta Munnorah gas pipeline project

Thanks to great team work with our Australian agents Messers Transmark FcX we have landed an important order for large size API 6D ball valves for the Colongra Lateral Pipeline from GHP-Alinta Asset Management.
